

## **Please register your pet dog, cat or ferret coming from Ukraine to Denmark**

**Have you brought your pet dog, cat or ferret (pet) from Ukraine to Denmark due to the current Russian invasion? If yes, the Danish Veterinary and Food Administration ask you to provide us with relevant information concerning your pet animal.**

As rabies is present in Ukraine, it is important that there is special attention to dogs, cats and ferrets, which can be carriers of the rabies virus. To ensure that Ukrainian pets in Denmark are free of rabies, the Danish Veterinary and Food Administration must perform official control including physical check on your pet animal. It is necessary for the performance of the official control that you provide the relevant information.

### **Fill in a special information form**

Persons arriving in Denmark from Ukraine with their pets are asked to fill in a form as soon as possible. Please see next page for the form or below for electronic version via QR code. Once you have filled in the form, please send it together with relevant documentation regarding your pet's animal health status to the Danish Veterinary and Food Administration (DVFA): [email@fvst.dk](mailto:email@fvst.dk)

Once the Danish Veterinary and Food Administration has received the form and relevant documents, we will contact you as soon as possible for further arrangements. In most cases this will involve inspection visits by an official veterinarian. Depending on your pet's health status isolation and if necessary measures such as rabies vaccination and antibody titration test of the animal could be required.

You can get more information on our website [foedevarestyrelsen.dk/english](http://foedevarestyrelsen.dk/english) and below via the QR code.

### **Your pet should be isolated**

We urge you to keep your pet isolated until the Danish Veterinary and Food Administration has contacted you for further arrangements. This means that your pet should avoid contact with other animals and humans than the pet owner who have travelled with the pet to Denmark. When airing your dog keep it on a short leash. Keep birds, cats and ferrets indoors.

### ***Please fill in the form as soon as possible***
